PPS. You guys ask me why I still release so often when I don't have much free time due to work?
I was able to finish programming of my new tools that were in development for weeks. These tools
allow me to automate most of the stages of denuvo v4 cracking. Result - this update of Tekken 7
was cracked within 2 fucking hours. "Improved denuvo", my ass.

PPPS. If you like my releases and enjoyed last 2 months of non-stop denuvo banging, you can support me >>
